Letter of Recommendation for Muna Oli

To whom it may concern,

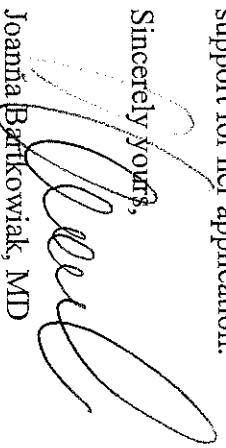

It is my great pleasure to provide a strong recommendation for Muna Oli's. I got to know Muna in June 2022 in my role as a Co-Investigator of the School-Centered Primary and Secondary Rheumatic Heart Disease Prevention Program conducted at Tulsi Boarding Higher Secondary School in Nepal, in collaboration with the University Hospital of Bern, I had the privilege of working closely with Muna, and I can confidently endorse her.

Throughout her involvement in our project, Muna Oli has displayed an exceptional level of knowledge and expertise in disease prevention, screening, and patient care. Her contributions to our research project have been remarkable, proving her ability to work independently and methodically. She consistently exhibited exceptional analytical skills and attention to detail, ensuring the accuracy and reliability of data collection and analysis. Her effective collaboration with other team members and excellent communication skills have greatly contributed to the development of our project. Additionally, she has shown great initiative by organizing free counseling sessions and workshops to educate students about the signs and symptoms of rheumatic heart disease. Her solid foundation in this field has proven invaluable to the advancement of our research endeavors.

Muna Oli is an open-minded individual with a strong desire to broaden her experiences abroad and expand her international network. Her high motivation, excellent English proficiency, and friendly personality make her well-suited to adapt to any new working environment. Given her outstanding clinical and academic achievements, I am personally convinced that Muna Oli fully meets the requirements for entering the master's program in nursing.

I am more than willing to provide additional information if required and want to emphasize my full support for her application.

Sincerely yours,

Joanna Bartkowiak, MD

Postdoctoral Research Fellow
